

MUHAMMAD MOHSIN NEHAN

Frontend AI Engineer | React.js • JavaScript • AI-Integrated Web Applications

Bahawalpur, Punjab, Pakistan | 03156034636 | nehanmohsin890@gmail.com

linkedin.com/in/mohsin-nehan | github.com/mohsin03nehan

SUMMARY

Software Engineering student (BSSE, expected 2027) and Frontend Developer with 2+ years building responsive web applications in React.js, JavaScript, and Tailwind CSS. Currently a Front-End AI Engineer intern at FlyRank AI, building AI-integrated frontend interfaces and completing structured AI-assisted development assignments (feature builds, prompt-workflow comparisons, automated testing). Has shipped live client and personal projects, including a multi-page e-commerce platform (Techova) and a production tailoring-brand website (ZEBAYSH), and has hands-on Python development experience from a dedicated internship.

SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Next.js, Responsive Web Design, UI/UX Design

AI-Assisted Development: Vercel AI SDK, Google Gemini API, LLM integration, AI-assisted development workflows (prompt engineering, GitHub Copilot), AI integration within frontend workflows

Backend : Python, Node.js

Tools & Testing: Git, GitHub, react-hook-form, Zod, Vitest, CI/CD pipelines, Lighthouse & Web Accessibility (WCAG/WAVE) auditing

Languages: English (Full Professional), Urdu (Full Professional)

EXPERIENCE

Front-End AI Engineer (Intern) — FlyRank AI

Remote | Jul 2026 – Present

- Build responsive frontend interfaces for AI-powered web applications using React.js, JavaScript, HTML5, and Tailwind CSS, applying Responsive Web Design principles and contributing to AI integration within frontend workflows.
- Completed onboarding assignment FE-01: configured the Node.js/Git/AI-IDE toolchain, initialized the capstone GitHub repository (README, license, .gitignore, CLAUDE.md), and established a Conventional Commits workflow, creating a reproducible setup used across all later assignments.
- Delivered assignment FE-03 by building a React user-profile settings form twice — once from a vague prompt and once from a precise prompt — to compare AI-assisted workflow outcomes, using react-hook-form and Zod for validation and Vitest for automated tests, with the precise-prompt version passing all test suites.
- Maintain Git/GitHub version control across all internship deliverables, following mentor-defined project structure and commit conventions.

Python Developer (Intern) — CodeAlpha

Remote | May 2026 – Jun 2026

- Completed a 2-month, task-based Python development internship, applying Python programming, data handling, and debugging skills to real-world development exercises.

PROJECTS

FlyRank AI Resume Tailor — AI-Powered Resume Optimization Tool — Next.js 16, Vercel AI SDK, Google Gemini API

- Built and shipped a production AI resume-tailoring web app using Next.js 16 and the Vercel AI SDK to call Google's Gemini model, generating role-specific resume rewrites from a user's CV and a target job description.
- Achieved Lighthouse scores of 92/100/100/100 (Performance/Accessibility/Best Practices/SEO) and zero WAVE accessibility errors, with a fully green CI pipeline; deployed live on Vercel as the lead case study of the FlyRank Frontend AI Engineering internship track.

Techova — Multi-Page E-Commerce Platform — React.js, Tailwind CSS

- Built a multi-page, responsive e-commerce platform from an SRS through to GitHub deployment, using React.js and Tailwind CSS across four core modules — users, products, orders, and an admin panel — earning an A+ project evaluation.
- Diagnosed and resolved local environment issues (broken virtual-environment paths, missing environment variables, dependency typos) to stabilize the development setup.

ZEBAYSH — Tailoring Brand Website — HTML5, CSS, JavaScript, Responsive Web Design

- Designed and developed a responsive one-page website for a made-to-order tailoring business using HTML5, CSS, and JavaScript, live at zebayshofficial.vercel.app; the client reports increased orders since launch.
- Built a custom image slider, an Instagram-linked gallery, and multi-channel contact functionality, focusing on responsive design, usability, and a consistent user experience across devices.

LEADERSHIP

Aspire Leaders Program – Cohort 3 (2026) — Aspire Institute

Oxford, England, UK (Remote) | Jul 2026 – Present

- Selected for a global leadership development program; completing workshops on communication, leadership, and problem-solving alongside participants from diverse international backgrounds.

EDUCATION

The Islamia University of Bahawalpur — Bachelor of Software Engineering (BSSE)

Oct 2023 – Jul 2027 (Expected) | Merit-Based Scholarship Awardee

Moon Boys College, Bahawalpur — Intermediate, Pre-Engineering

Sep 2020 – May 2022
